

## FINAL REPORT

Date : 23.03.2025

IO No. : 25-02021L02

B.A Ref No. : 671-05

DATE OF INSPECTION	12,14 & 16 to 18.03.2025		
TO	SGS Tehran/ Mineral's Div. <b>Ms. Tafakh</b>		
PRINCIPAL			
REQUIRED INSPECTION	Packing, Marking, Stuffing Supervision, Sampling, ....		
QUANTITY	<b>40 × 40 Ft. Containers</b>		
BOOKING	<b>25000699</b>		
GOODS DESCRIPTION BY PRINCIPAL	<b>BITUMEN 60/70</b>		
PLACE OF INSPECTION	<b>Khateh Noghrehei warehouse - Shahid Rajaei Port Complex - B. Abbas - Iran</b>		
PACKING & CARGO CONDITION	-The commodity was poured in the steel drums with black appearance. -Each drum has a lid on the top side. -Amongst the dimension checking of drums following figures was obtained:		
	Height of drums	:	98 ± 0.5 Cm
	Dia. of drums	:	50.5 ± 0.5 Cm
	Dia. Of cap lid	:	10.5 ± 0.5 Cm
			
MARKING	-So far as it could be checked during stuffing operation, following marking(s) were observed on body of drums. -Sticker marking:		
	<b>Manufacturing batch : 2025-03-456</b> <b>Material name : Bitumen</b> <b>Material : Bitumen</b> <b>Model : 60/70</b> <b>Specifications : 60/70</b> <b>Color : Black gray</b> <b>Quantity : 180 (+/-3) KG/Drum</b>		
	<b>NOTE:</b>  -The marking was attached on bodies of drums at WH by labours.		
			

**EMPTY  
CONTAINER  
CHECK FOR  
CLEANING**

-Prior to cargo stuffing commencement, we checked visually the allocated empty containers and found them empty and without any residue cargo.

**DISCHARGING &  
STUFFING  
SUPERVISION**

-Bitumen drums were discharged from loaded trucks by means of a forklift with adequate man power.

-Each take of forklift discharged 8~12 drums which were directly stuffed into nominated containers. In each container two tiers of drums were stuffed, in first tier **115** and second tier **22, 23** drums were stuffed (Totally **137, 138** drums in each container).

-Under our supervision, **40 x 40 Ft.** containers were stuffed :

#### SAMPLING SAMPLE PREPARATION & DISTRIBUTION

-Sampling for **40 x 40 Ft.** stuffed containers was performed during stuffing operation from some randomly selected drums.

-A numbers of **18** drums, according to the ASTM Method D-140M-09(Standard Practice for Sampling Bituminous materials) were selected randomly for sampling.

-After drawn samples the said selected drums were stuffed into containers Items: **11-14-39.**

-The drawn samples were poured inside of metal can(s) which was sealed by SGS lab before and delivered to sampler to use for sampling.

-After completion of sampling the all drawn samples were delivered to the SGS preparation lab on **19.03.2025** in order to preparation and distributions.

#### Notes:

-Due to presenting cargo already packed in drums at the time of inspection, we've been restricted to take the increments from top level of drums only.

-The body of selected drums for sampling was marked as:" SAMPLED BY SGS" and "ITEM NUMBER OF SELECTED DRUMS FOR SAMPLING".

#### GENERAL NOTES

-The floor of nominated empty containers was covered by plastic sheet.

-As per declaration by principal representative, the drums were transferred from **Kermanshah** to Rajae port.

-During daily randomly visual checking and as much as possible to check, followings were attained:

- About 15 ~ 20% of drums were suffered from slightly dent on bodies during stuffing operation. (This due to the loading method performed by the man-power and

machine/forklift, which the drums were in the sound condition in an appearance before stuffing into containers).

- Stuffing operation of 40 containers was completed.

- The sole function of any seals applied by SGS is to indicate that the material bearing such seals has been inspected by SGS. Seals applied by SGS are not intended to secure material, lock the container of such material, or otherwise provide any security function. SGS does not provide security services and disclaims any liability in this respect.
